

Analytical Report

Description of Object: #2070320CSG-(125) A shaped, pecked, and abraded stone hand knife rendered in an ancient Upper Paleolithic to the earliest Neolithic style was submitted for examination and testing for authentication and analysis. It measures 15.2cm. x 8.7cm. x 2.7cm. Please note (previous page) the small somewhat uniform (Human) pecking and abrading signatures on all the upper convex/concave curving edge. Note that this constitutes an entire layer of serpentine that has been split and abraded on both sides along with micro-pecking on the edges.
